

## STEAMER GOES DOWN WITH LOSS 31 ON OREGON COAST

*Only Four of Crew of 35 Survive; Aid  
Ship Is Reported to Be in Distress;  
Four Drown in Another Wreck*

ASTORIA, Ore., Jan. 7.—The wireless station here has received a message to the effect that the Point Adams life saving crew, which rescued the men clinging to the rigging of the wrecked steamer Rosecrans, is unable to get back to shore owing to disabled boats. The tug Oneonta has gone to its assistance.

[illegible]

On 11/11/1962, two (2) of the following were taken from their pens: James Earl Ray, alias "Raymond" and "Eric" S. Galt, and "Raymond" and "Eric" S. Galt. The same day, the two were placed in the same cell with the other two. The two were placed in the same cell with the other two. The two were placed in the same cell with the other two.

**Goes Down With Aid Near** The Rosebuds are buried near the rocks of Bearish Point, at a place where the landscape changes abruptly from a grassy plain to a wooded area. The Rosebuds are buried in a shallow trench, and the bodies are covered with a layer of earth. The Rosebuds are buried in a shallow trench, and the bodies are covered with a layer of earth. ## SUMMING UP THE EVIDENCE

Many Colorado Springs People Have Been Called As Witnesses

Week after week has been published the testimony of Colorado Springs people—kidney sufferers, backache victims—people who have endured many forms of kidney, bladder or urinary disorders. These witnesses have used Doan's Kidney Pills. All have given their enthusiastic approval. It is the same everywhere. 36,000 American men and women are publicly recommending Doan's—always in the home papers. Isn't it a wonderful convincing mass of proof? If you are a sufferer your verdict must be "Doan's Kidney Pills."

Here's one more Colorado Springs case. Mrs. L. Peterson, 315 S. Hancock St., Colorado Springs, Colo., writes: "For the past six years I have recommended Doan's Kidney Pills. They have cured me of backache and kidney weakness. I have heard many other people praise Doan's Kidney Pills just as highly as I do. Others in my family have found Doan's Kidney Pills very good."

For sale to all dealers. Price 50 cents. Foster-McMillan Co., Buffalo, N. Y., sole agents for the United States.

Remember the name Doan's and take no other.

## COLD AND WARM TALK CAUSE SHORT SESSION

A mixture of the intensely cold weather and a heated discussion over the dropping of several condemnation suits which the city now has in the courts brought the council meeting to a hurried conclusion shortly before 8 o'clock last night.

The discussion arose when Alderman Reid moved that the suits be dropped, and was carried on with considerable vigor. The motion was lost for lack of a second, and the council then decided that it was too cold to deliberate on city affairs further. Adjournment followed at once.

The arguments in support of Reid's motion were based on the low condition of the city's funds at present and the fact that the condemnation suits are causing considerable expense. The compromise of the suits had been talked over several times before in council meetings, and it was argued that it would be better to withdraw them at once.

The cold, besides hastening the adjournment, led to the appointment of a committee, with power to act, to investigate the installing of stoves in the city hall for the comfort of the delegates to the charter convention, who will probably meet there almost every evening beginning Thursday.

The matter was thoroughly discussed by the council, and the committee's task will be to decide whether to rent or buy stoves. This committee is composed of Aldermen Lawrence and Horst.

Little other business, except routine matters, came before the council last night. Street Supervisor John Kelly was granted a two weeks' vacation, and needed repairs to the roof of the fire station were discussed. No decision was reached on this last matter, and it was left to a committee composed of Aldermen Lawrence and Horst.

Little other business, except routine matters, came before the council last night. Street Supervisor John Kelly was granted a two weeks' vacation, and needed repairs to the roof of the fire station were discussed. No decision was reached on this last matter, and it was left to a committee composed of Aldermen Lawrence and Horst.

schools will be closed during the entire time that the polls are open. In most cases the same polling places will be used, but were used at the general election in November.

Thirty-nine candidates have been nominated on three tickets, those of the Charter, the Democratic and the Nonpartisan parties. The names are arranged in alphabetical order on the ballots, with the party designation after each name. As the headless ballot has not gone into effect, the voters may write the name of the party for whose candidates they wish to vote at the top of the ballot and leave the rest of the ballot blank and they so desire. If they wish, they may write the name of one party at the top of the ballot and scratch for members of another party, or they may leave the space at the top blank and vote for 21 people by marking after names. The qualifications for voting at this election are the same as those for voting at the general election.

The 21 delegates chosen today will hold their first meeting, according to the ordinance providing for the election, at 7:30 o'clock Thursday evening, in the council chambers at the city hall. They are to meet regularly after that for the work of drawing up the charter for the city, and to have their labor completed within 60 days. The city council last night appointed a committee, composed of Aldermen Lawrence and Horst, to see to the installing of stoves in the city hall for the comfort of the delegates.

After the convention has completed the charter, it will be submitted to the voters of the city at another election for adoption or rejection. If adopted, it will amend the provisions of the twenty amendment to the state constitution, become the fundamental law of Colorado city, and its scheme of city government will be substituted for the one now in operation.

The candidates for positions in the convention, as well as others involved in the movement, have been studying the charters of other cities that have already adopted this form of government, and the convention probably will adopt many features that have worked out well in other places.

The thermometer at Palmer Lake went down to 22 degrees below zero Sunday night, and the roads there are almost impassable because of the snow, according to J. D. Boone, who came down from that place by train yesterday. He went to Denver Saturday to bring his new 60-horsepower automobile ambulance across country to this city, but found bad roads all along the route, and was finally stalled by the snow at Palmer Lake Sunday night. He was forced to store the machine in a barn, and spent the night at Palmer Lake, coming to Colorado Springs by train yesterday. The ambulance is still in the barn at Palmer Lake, and will be left there until the roads are in better condition.

PRICE FIVE CENTS

## STEAMER GOES DOWN WITH LOSS 31 ON OREGON COAST

*Only Four of Crew of 35 Survive; Aid Ship Is Reported to Be in Distress; Four Drown in Another Wreck*

**ASTORIA, Ore., Jan. 7.**—The wireless station here has received a message to the effect that the Point Adams life saving crew, which rescued the men clinging to the rigging of the wrecked steamer Rosecrans, is unable to get back to shore owing to disabled boats. The tug Oneonta has gone to its assistance.

A telephone interview report from about a dozen people tonight stated that the described helicopters were seen coming in at night. This was the first time that the helicopter had been reported by the disabled craft at that time. The report also stated that the two were caught and a high wind prevented it, although the object was

ASTORIA, Ore., Dec. 1. — The steamer "General" from the coast of P. E. John, who had beached into the sea near the boat, reached the shore at 10:30 a.m. today on Fraser.

The Rosecrans was buried under the packs of Pincock Point at a same place where the stranding Channel was higher, near ground level, and the "Pincock" was visible from the scene of the stranding. The stranding was a few days younger. Come to the beach, the weather the point of the Rosecrans was the heaviest to 5000 feet.

**Deserted Bride on  
Honeymoon 2 Years  
Ago; Arrested Here**

George Evans has unapologetically exhibited his elegant apartments in the "Antlers hotel" for a bunk bedded back and key in the "Red pen" in the city. He has reported that he is just getting out of a war-torn town in the district of Armenia's offer to conduct of his wife, formerly Miss Ella Pitts, of 440 Erie Park avenue, Mantoloking, who changed his wife with newspaper in the morning life of deserting her for the pigs and life savers could appear enough to put a line about his wife's life in the "Antlers hotel" only her marks and funnel appeared above the water, with three men of the crew clinging to the rigging.

Was It Fated Ship.

SAN FRANCISCO, Jan. 7.—Trouble perched on the forepart of the Roanoke when she was launched at the

during their honeymoon, then, through the influence of Mrs. Evans, a shortly after marriage, in 1911, she left the summit of Table Mountain, and did not see him again until shortly after his arrival yesterday, when she got a glimpse of him on the ground. Since the alleged desertion, Mrs. Evans has been in Mantion, her home, since 1912, and never left her home since.

"And I," said J. Johnson, her neighbor, who lives within her home, after three weeks' waiting, "am fairly sure that he was fraudulent."

On an early wage day, one of the Phoenix Park rangers, who surrounded his confederates in the assault,

Plans registered at the hotel under the name of Edwards, and his return, the wife believes, is to try to effect a rescue thereon. If this is true, he has met with a reception he had not expected.

Plans met Miss Platt shortly after his arrival in Mauritius from Chicago five or six years ago, and those who witnessed the scene, and those who have known the couple, are of the opinion that

On March 15, 1910, after fighting a  
furious, gale all night, she grew un-  
manageable and was tossed broadside  
on the rocks at Alcaraz, 20 miles north  
of Santa Barbara. The ship's carpenter  
and a quartermaster were washed  
overboard and were drowned.

Evans maintained silence when arrested and taken to the city jail, declining to discuss his predicament. He was dressed in the height of fashion and had \$30 in cash in his possession.

STEAMER GOES DOWN

(Continued From Page One.)

The weather moderated and it was seen

that the steamer was not lost.

Patched up and put to work again,

the steamer caught fire five months

later while taking on oil at Cavaya

and burned to the water's edge.

The owners put another handful of

thousands into her in repairs and sent

her to sea again.

This time she made a complete job

of it on the rocks at New York Spit,

taking her ground and making more

than 200 men to death with her.

The names of the sailors may never

be known. This being the first trip

of the steamer since she was repaired

after the first "delicate" shell

containing the names of the steamer for

the record of the sailors which was lost

with the ship.

Steamer Chesapeake Wrecked.

VANCOUVER, B. C., Jan. 7.—The

little steamer Chesapeake, owned by the

Union Steamship Company of Vancouver,

was wrecked today off Van Ande,

## CHEMICAL SCHEDULE LIKE VETOED BILL

Hearings Adjourned on One  
Section of the Proposed  
Tariff Measure

WASHINGTON, Jan. 7.—Public hearings on the chemical schedule of the proposed tariff legislation to be enacted at the coming session of congress were closed today. It was indicated that the Democratic majority of the house committee on ways and means will endorse a chemical schedule almost identical with that embodied in the bill that previously passed both houses of congress and was vetoed by President Taft. It is possible that there may be some modification of rates on spices, but this is uncertain.

The only indication of possible changes shown throughout the long hearing today was when J. Gibson, a New York lawyer, argued for a 50-per cent duty on spices and on all other luxuries.

"Wouldn't it tend to cut off importation if we put a higher duty on spices?" asked Chairman Underwood.

"No," replied the witness, who added that spices, running from 5 cents to 15 cents a pound, were not expensive.

Mr. Gibson wanted to put cut liver oil on the free list because of its medicinal value to sickly and decrepit children. He classed spices as luxuries, traceable to sybaritic and voluptuous conditions in ancient Rome.

"No mother," said he, "gives her child spices, but does any one take them from real liking?"

The chemical schedule did not evoke as strong an opposition as the committee expects will be aimed at several of the other schedules.

## WOMEN WOULD PURIFY POLITICS, SAYS CLARK

WASHINGTON, Jan. 7.—In an address before the Women's National Democratic League, which convened here today in its first annual conven-

MRS. JOHN SHERWIN CROSBY.

President of the National Women's Democratic League, which convened in Washington yesterday.

Don. Speaker Champ Clark expressed the belief that the advent of women in politics would have for its field of endeavor the amelioration of the conditions of the human race, the relief of poverty and the inculcation of morality.

The speaker was followed by Mrs. John Sherwin Crosby of New York, president of the league, who, in announcing her candidacy for reelection, answered criticisms aimed to discredit her right to that position. In calling attention to opposition to her as president because of her political principles, Mrs. Crosby defended her opinions and admitted that she is a free trader and an advocate of the single tax theory. The announcement created some surprise because it had been understood that Mrs. Crosby would not be a candidate to succeed herself.

More than 300 women from all parts of the country attended today's session.

north of Vancouver. Wireless messages say three passengers and a member of the crew perished. The other passengers and seamen were rescued by the steamer Camosun of the same line, which reported the disaster. The Chesapeake plied between this port and Texas Island, 75 miles northward.

The Chesapeake sank alongside the wharf at Van Ande, according to the brief message from the Camosun to the company offices here. Captain Cooke of the Camosun reported that his vessel was standing by, after having rescued all but three passengers and the second cook. His wireless said that the hull of the Chesapeake appeared to be sound.

The Chesapeake was the smallest of the Union Steamship company's vessels and was employed in the so-called "logging" camp run. She drew her passenger list chiefly from the men of the woods.

## MINER BURIED UNDER AVALANCHE OF COAL

DELTA, Jan. 7.—Daniel Maloy, a miner, was buried beneath hundreds of tons of coal today when he caused an avalanche by digging with his pick into a narrow ledge. Maloy was killed by the fall of coal and his body was recovered nine hours later after a score of fellow miners had lent their energies to his rescue.

## JURY IS SELECTED TO TRY PETER FORTE

PURDUE, Jan. 7.—After two days, a jury was selected this afternoon to serve in the trial of Peter Forte, charged with having murdered the wife of Jesse Forte last September.

## TWENTY MEX. CANS KILLED BY MISTAKE

Federal Troops Clash When  
One Body Is Taken for  
the Enemy

TOLUCA, Mexico, Jan. 7.—Twenty federal soldiers were killed today, owing to a clash between two bodies of government troops by mistake who had been brought to Toluca as a sequel to the attack on Sunday by 60 followers of Zapata on a passenger train 15 miles to the south of this city.

A detachment of light cavalry had been sent to protect the passengers of the wrecked train and to convey them here. As they were marching, they were observed by another body of federal troops approaching the same spot, and these opened fire on the cavalry.

Later it was found that this was a detachment of federal infantry, but before the commanders of the two forces had recognized that they were fighting comrades, 20 men were lying dead on the field.

## FRUIT CROP

(Continued from Page One.)

visions made by the city council, will bring relief from the famine by tomorrow. The lower parts of the city are enjoying a limited supply of the precious necessity. Water has been turned into the mains from the artesian wells and small irrigation ditches.

The temperature reached a maximum of 13 degrees above at noon today. At 5 o'clock the mercury was holding its own at 10 above.

## Livestock Suffer in New Mexico.

ALBUQUERQUE, N. M., Jan. 7.—The coldest weather in 25 years continues general over New Mexico, with no signs of immediate abatement. It was seven degrees below zero here last night, while other sections of the state reported temperatures as low as 24 below zero.

Because of the snow on the ranges and the unusual severity of the weather, losses are occurring among cattle and sheep on the ranges, and unless the weather soon moderates, these losses will be heavy.

## Rivers Frozen Over.

ROSWELL, N. M., Jan. 7.—For the first time in history, rivers are frozen over here. The thermometer stood around zero all day, it being below the lowest at 8 a. m. The weather is clear, no wind, and six inches of snow have fallen.

## Four Above at El Paso, Tex.

EL PASO, Tex., Jan. 7.—Unseasonably cold weather still continues throughout west Texas tonight. Temperatures at this point today ranged from a minimum of four degrees above zero, at 6:30 o'clock this morning, to a maximum of 22 above at 4 p. m. At 6 o'clock tonight, the government thermometer registered 20 degrees above zero. Zero weather before morning is expected by the government observer. No snow fell here today.

## Expect Relief Today.

SAN FRANCISCO, Jan. 7.—Tomorrow morning will see the end of the devastating cold spell that has held California in its grasp for the last three days, according to Alexander G. McAdie, director of the government weather bureau at San Francisco.

The lowest temperature reported at Los Angeles today was 25 degrees above zero, which also was the lowest mark reached in San Diego. At other points in the south, however, the mercury dipped as low as 18 degrees. In San Francisco the maximum was 39.

## Flood Warning Issued.

SEATTLE, Wash., Jan. 7.—The United States weather service issued a flood warning today to dwellers in the lowlands of western Washington, pointing out that the melting of the mountain snows must cause the overflowing of rivers, already at the danger point. Rain fell all day in the lower altitudes of western Washington, and soft snow in the mountains.

## Traffic Demoralized.

SEATTLE, Wash., Jan. 7.—Snow slides in the Cascade mountains completely blocked the Chicago, Milwaukee & St. Paul's transcontinental line today, and the Milwaukee's overland trains were being operated tonight over the mountain division of the Northern Pacific, which is also handling the Great Northern's Chicago trains.

An avalanche buried a Milwaukee snow plow at Laconia today. The rotary was liberated tonight. No one was injured.

Five feet of new snow has fallen at the summit of the Cascades since last night, and the snow in the mountains is now 12 feet deep. Blowing snow storms, driven by a high wind, is raging in the mountains, and Milwaukee

## 73 at Birmingham.

BIRMINGHAM, Ala., Jan. 7.—All January heat records in Birmingham were broken today, when the thermometer registered 73 at 1 o'clock.

## Water Famine at Tulsa, Okla.

TULSA, Okla., Jan. 7.—With the Arkansas river frozen solid, Tulsa's water supply was cut off today, and the municipal electric light and power plant was forced to close down tonight after all the available artificial ice had been melted to supply the boilers with water. The Arkansas river is the city's only water supply. It is frozen over for the first time in 20 years.

The lowest temperature today was 5 above zero. Many cattle are reported to have frozen to death in Osage pasture lands.

## Snow in Wisconsin.

MILWAUKEE, Jan. 7.—Snow is general throughout Wisconsin tonight.

## KANSAS CITY, Jan. 7.—This city

is faced a gas shortage tonight, according to a statement by the receivers of the Kansas Natural Gas company, and the officials of the local gas company. They said that all the gas in the reserve tanks had been used and that cold weather continued there would be a gas famine here unless the people stopped using gas for heating purposes.

A temperature of 12 above zero prevailed tonight with warmer weather promised for tomorrow.

## Speechless For Thanks

Meina, Ark.—"I find Cardui to be all you represent," writes Mrs. H. B. York of this city. "I suffered from womanly ailments, for nearly two years, before I tried Cardui. I have been so relieved since taking it. I cannot say enough in its praise. It has done me a world of good, and I recommend Cardui to all women." Cardui is over 50 years old, and the demand is greater today than ever. Cardui is the standard, tonic medicine, for women of every age. Would you like to be well and strong? Then take Cardui. Its record shows that it will help you. Begin today. Why wait?

## Prices Must Be Reasonable.

The first decade rental charge is 5 mills per 1,000 kilowatt hour. The secretary thinks the fact that his successor at the end of each 10-year period will have the power to increase the rental charge, if it should appear that the company was charging consumers unduly high prices, "will of itself and without the exercise of that power, exert a constant pressure upon the company, inducing it to make its prices reasonable."

The company's transmission lines, built several years ago, "was under permit revocable at any time by the secretary; and the railroad company was unwilling to spend millions of dollars on electrification as long as the power company's rights were revocable at any time by the government."

## GIVES BABY POISON, AND THEN TAKES DOSE FOR SELF

LA JUNTA, Jan. 7.—Mrs. O. R. Northrop, wife of a prominent business man here, today gave her 2-year-old baby a quantity of strychnine in syrup of figs and then took a dose of the same poison herself. She was dead when discovered by neighbors, but the child had not been given enough poison to kill it immediately. Physicians believe that it will recover.

## WATER PIPE BURSTS

A frozen water pipe in the wall on the second floor of the Majestic building burst at 1 o'clock this (Wednesday) morning, flooding the hall. The water seeped through the floor into the stores on the first floor, causing considerable damage to merchandise. Employees of the water department were summoned by the police to stop the flow of water into the building.

## WILSON LEADS FIGHT NEW JERSEY BANKER

Takes Hand in Politics of Own  
State Advising Legis-  
lators

TRENTON, N. J., Jan. 7.—Governor Wilson gave today an example of his system of political purgation when he saw individually nearly all of the Democratic members of the state legislature and urged them to vote for Edward E. Crosscup, Democratic state chairman, for state treasurer, as against Edward I. Edwards, also a Democrat, and at present comptroller of the state.

The governor argued with the legislators that while he was a warm personal friend of Mr. Edwards, he believed the latter's banking connections made it inadvisable to elect him state treasurer, a position which controls the deposits of public funds.

"I feel perfectly sure of the result and confident that there will be a large vote for Mr. Crosscup," was the governor's comment tonight. Friends of Mr. Edwards, however, disputed the claim, declaring the fight was not over.

The legislature meets a week from today. The governor had only one other kind of business before him. Delegations of men and women representing labor organizations made a formal appeal for the reappointment of Lewis T. Bryant, a Republican, as commissioner of labor in this state.

One of the spokesmen remarked that "both sides," meaning Democrats and Republicans, favored Mr. Bryant's reappointment.

"I am sorry that there should be any sides in a matter of this kind," said the governor, with a smile when he replied to the delegation, "and though I do not usually say in advance what I am going to do in appointments, I want to take this opportunity of adding my testimonial to Mr. Bryant's excellent service."

## GOVERNMENT GRANTS ELECTRIFICATION OF MONTANA RAILROAD

WASHINGTON, Jan. 7.—What Secretary Fisher believes to be the best plan for the electrification of all transcontinental railroads was nuked today by a grant to the Great Falls (Montana) Power company to transmit, over public domain, under strict government regulations, power for the electrification of 450 miles of tracks of main line of the Chicago, Milwaukee & Puget Sound railroad, between Harlow Tower, Mont., and Avery, Idaho.

The fact that the Great Falls company was "willing to accept the fullest provisions for the protection of public interests, even where all it was asking was for a transmission line," is of even greater importance from the public benefit point of view, asserted Secretary Fisher today, than the further great electrification of railroads which must follow.

"It demonstrates," he continued, "not only that the provisions for protection of the public interest, upon which the department of the interior insists, do not prohibit water power development which has yet taken place, and the practical application of electricity can be and is being taken and delivered power to the mines at Butte and Anaconda and to all other classes of power consumers which can be served by them."

In addition to furnishing power for electrification of part of the Chicago, Milwaukee & Puget Sound railroad, the Great Falls Power company also will deliver power to the mines at Butte and Anaconda and to all other classes of power consumers which can be served by them.

Interior department officials expect that much of it ultimately will be used for pumping irrigation water on land now arid.

The amount of rental charged the power company in the first year will be nominal, and Secretary Fisher said he thought it should remain a low figure, "so long as the prices exacted of power consumers are reasonable."

Prices Must Be Reasonable.

The first decade rental charge is 5 mills per 1,000 kilowatt hour. The secretary thinks the fact that his successor at the end of each 10-year period will have the power to increase the rental charge, if it should appear that the company was charging consumers unduly high prices, "will of itself and without the exercise of that power, exert a constant pressure upon the company, inducing it to make its prices reasonable."

The company's transmission lines, built several years ago, "was under permit revocable at any time by the secretary; and the railroad company was unwilling to spend millions of dollars on electrification as long as the power company's rights were revocable at any time by the government."

## GIVES BABY POISON, AND THEN TAKES DOSE FOR SELF

LA JUNTA, Jan. 7.—Mrs. O. R. Northrop, wife of a prominent business man here, today gave her 2-year-old baby a quantity of strychnine in syrup of figs and then took a dose of the same poison herself. She was dead when discovered by neighbors, but the child had not been given enough poison to kill it immediately. Physicians believe that it will recover.

## WATER PIPE BURSTS

A frozen water pipe in the wall on the second floor of the Majestic building burst at 1 o'clock this (Wednesday) morning, flooding the hall. The water seeped through the floor into the stores on the first floor, causing considerable damage to merchandise. Employees of the water department were summoned by the police to stop the flow of water into the building.

## ELDERLY FOLKS! CALOMEL, SALTS AND CATHARTICS AREN'T FOR YOU

Harmless, gentle "Syrup of Figs" is best to cleanse your stomach, liver and 30 feet of bowels of sour bile, decaying food, gases and clogged-up waste.

You old people, Syrup of Figs is particularly for you. You who don't exercise as much as you need to; who like the easy chair. You, whose steps are slow and whose muscles are less elastic. You must realize that your liver and ten yards of bowels have also become less active.

Don't regard Syrup of Figs as physic. It stimulates the liver and bowels just as exercise would do if you took enough of it. It is not harsh like salts or cathartics. The help which Syrup of Figs gives to a torpid liver and weak, sluggish bowels is harmless, natural and gentle.

When eyes grow dim, you help them. Do the same with your liver and bowels when age makes them less active. There is nothing more important. Costive, clogged-up bowels means that decaying, fermenting food is clogged there and the pores or ducts in these

thirty feet of bowels suck this decaying waste and poisons into the blood. You will never get feeling right until this is corrected—but do it gently. Don't have a bowel washday; don't use a bowel irritant. For your sake, please use only gentle, effective Syrup of Figs. Then you won't be dragging yourself for Syrup of Figs is composed of only luxurious figs, senna and a small amount of licorice which can not injure.

A teaspoonful tonight will gently, but thoroughly, move on and out of your system by morning all the sour bile, poisonous fermenting food and clogged-up waste matter without gripe, nausea or weakness.

But get the genuine. Ask your druggist for the full name, "Syrup of Figs and Elixir of Senna." Refuse, with contempt, any other Fig Syrup unless it bears the name—prepared by the California Fig Syrup Company. Read the label.

## WORK FRANTICALLY TO RESCUE MINERS Caught in Shaft at Bingham Under Hundreds of Tons of Rocks

BINGHAM, Utah, Jan. 7.—Four men were killed and three seriously injured in the copper mines at Bingham today. Three of those dead were crushed to death beneath a pile of rock and earth in a cavern at the Jordan mine of the United States Mining company's properties early this morning, and one was killed tonight at the United States mine, when he fell down a shaft 75 feet deep and broke his neck. Three Austrian miners were caught beneath a rock slide at the Highland Boy mine. Two received broken legs. One was injured internally, but will recover. The dead:

EVERETT SQUIRES, shift boss;  
WALTER HARWOOD, machinist;  
Two Greek miners.

The cavern at the Jordan mine occurred early this morning as Night Foreman Thomas and Shift Boss Squires, accompanied by two miners, were leaving a deserted stope. Thomas escaped injury, but Squires and the two miners were caught behind a wall of rock and earth. The body of one of the miners was recovered today, while Squires and the other miner still remain beneath the debris, and all hope of rescuing them alive has been abandoned.

For a while this morning Squires communicated with the rescuing party through a wall of rock. A pipe was inserted through the wall to give the men more air. Immediately the crash of a second cavern was heard, and communication with the entombed men was lost. It is believed they were killed by the second fall of rock. A third miner reported missing and believed to have been buried by the cavern has been accounted for.

Harwood was killed today, a few minutes after starting to work. While making a tour of inspection, he stepped into an open shaft, and fell 75 feet.

The rock slide at the Highland Boy mine occurred at almost the same time as the cavern at the Jordan mine.

## COL. JOHNSTON TAKES OATH AS U. S. SENATOR

WASHINGTON, Jan. 7.—Col. R. M. Johnston of Houston today took the oath of office as a senator from Texas, to succeed Joseph W. Bailey.

## FILES CURED IN 4 TO 10 DAYS Your druggist will refund money if PAZO OINTMENT fails to cure any case of Itch, Eczema, Bleeding or Protruding Fleshy Skin in 10 Days. 50c.

## SHEPHERD DOG SAVES LIVES TWO CHILDREN

TRINIDAD, Jan. 7.—A shepherd dog saved the lives of two infant children of Nels Zurta, tonight, after a cat had knocked a lighted lamp from a table onto the bed in which the two babies were sleeping.

## NEW YORK, Jan. 7.—Both sides in the garment workers' strike drew their lines closer today, preparing for a protracted struggle.

Cures a Cold in One Day, Cough in 3 Days

## BANK CLEARINGS SHOW SPRINGS ONE BEST IN WEST DURING YEAR 1912

DENVER, Jan. 7.—Denver ranked fifth as to bank clearings in 1912 in list of western cities prepared by R. C. Dun & Co. and sent out yesterday. The only cities topping Denver in volume of business transacted through the banks were Kansas City, Minn.apolis, St. Paul and Omaha. Their total clearings were \$497,843,300.93, against \$455,837,328.19 for Denver, showing a gain of 8.3 per cent.

Leading cities of the middle west, bank clearings in 1912 were the following:

Kansas City	\$2,713,027.11
Minneapolis	1,832,232.44
Omaha	807,000.00
St. Paul	573,168.77
Denver	455,837,328.19
Duluth	238,472.55
Des Moines	232,425.58
St. Louis	167,082.11
Wichita	161,154.14
Cedar Rapids	74,224.45

## TO SAVE LIVES

NO NOBLER or more necessary work is carried on in Colorado Springs than that of the Visiting Nurses association, the annual meeting of which is to be held this afternoon at 4 o'clock. The association endeavors to care for all the sick and ailing of the city who are too poor to employ a nurse. More than that, it tries to teach mothers the best methods of caring for and feeding their babies, to instruct the people in sanitary and hygienic living, and, of especial importance here in Colorado Springs, to point out to tuberculars the way in which health may be recovered.

The fact that the nurses in the employ of the association during the past year made about 200 visits a month proves the great need of the work the association was formed to carry on. The further fact that all this splendid service to the sick was rendered for \$5,000 shows how carefully the funds of the association are husbanded.

Yet the officers of the association feel that they are not doing all they should do. More money is urgently needed. Every cent can be used in furthering the work of the association. And every cent so used goes directly to the preservation of lives that otherwise might be lost. All citizens should unite in hearty support of this splendid charity.

## THE REPUBLICAN REQUIEM

EVEN President Taft's most ardent friends must admit that there was little in his "reorganization" speech of last week that will aid in bringing the Progressives back into the Republican fold. Progressives will discover in this speech, as well as in every other speech he has ever made, his utter lack of understanding of what the new political movement hopes to accomplish.

For instance he assumes that the Progressive party's social justice program is based only on a sentimental desire to benefit those who are dependents, forgetting the "interest of those who are not dependents and who yet make up the great majority of the common people." Dependents are now fairly well cared for. The Progressive program, as anyone acquainted with modern social problems would understand at a glance, has for its primary purpose the securing of a greater degree of justice for the men and women who work.

Mr. Taft himself confesses that the only reforms he finds necessary or possible are more economical and efficient administration of the government. As if starving garment workers, child laborers in the canning factories, men who toil 12 hours a day, six days a week, would be benefited in any appreciable degree by the saving of a million or so dollars in some governmental bureau! But, at projects for social reform, the president can only sneer: "I cannot join in the glowing promise that government action can remedy all of the evils of poverty, sin, disease and ignorance as set forth in the prospectuses of an ambitious political party."

The president is not satisfied with thus attempting to condemn as visionary the very definite and entirely practicable Progressive remedies for certain definite evils such as child labor, underpaid women workers, overworked steel workers. He goes farther, and, in attempting to show how impossible it is for a majority to govern a nation, he deliberately misrepresents facts. He brackets Great Britain and America as nations in which it has been proved that the majority must be restrained for the protection of the minority.

Yet, as a matter of fact, he knows, if he is at all acquainted with English constitutional law, that in England the majority is not restrained, as it is here in America. The majority is supreme. It is supreme over parliament, for, if parliament runs counter to its wishes, the dominant party in parliament—the government—may be recalled, and a new government, a new ministry, installed. It is supreme over courts and laws, for the will of the people, as expressed in a law passed by parliament, may not be questioned by any court.

When the new manhood suffrage bill championed by the Asquith ministry is passed, and when women are granted the suffrage, England will be practically a pure democracy. And yet President Taft cites England as proving that a majority may not be trusted to govern a minority with justice!

President Taft's fears of the evils that may come from majority government, from that democracy that the Progressive party insists upon, are purely theoretical. Majority government, as a matter of fact, has never resulted in the injustices for which he professes such fear. The people are more to be trusted than his aristocratic mind believes. Many American states, and most commission-governed American cities, now have democratic government. Have the people in those cities and states proved as unjust to the minority as the president claims they would?

Majority government, of course, is not perfect. The people sometimes make mistakes. But does President Taft for a moment claim that the minority government we now so often have under the present system is without flaw? Has government by a majority, for instance, ever inflicted such a wanton injury upon the people as did the Colorado Springs aldermen, a few years ago, absolutely denying the rights of the majority, gave away power rights worth millions of dollars?

President Taft's speech has only shown the intention of the little clique who have seized control of the Republican party to continue that control at all hazards. He has emphasized the assertion of Progressive leaders that there is no hope in the Republican party for those who believe in progress; he has made it perfectly plain that he, and the men who support him, have no conception of the social needs of the country, and that their ideas are utterly at variance with the democratic aspirations of the people.

President Taft did more than preach his own funeral sermon. He sang the requiem of the Republican party.

## NEXT THE "TALKIES"

WILL the "movies," within a few more years, put an end to legitimate drama? Thomas A. Edison answers in the affirmative. He says he has at last perfected an apparatus by which the speech of the actors will be reproduced at the same instant and in thorough harmony with every motion of the shadow-actors on the picture screen. Edison has been working years to perfect a phonograph that would work in perfect harmony with the cinematograph. Now, he says, he has been successful.

As a result he predicts that the finest and grand opera will be seen and heard in villages, and that the best of singers and actors will forsake an abandoned stage to sing and act for what he calls the "talkies."

## OUR SOLE HOPE

CERTAIN not altogether disinterested Coloradans have scolded the federal government for tying up the power resources of this state. Within the past month a great power trust has begun the absorption of all Utah and Colorado power plants. We must soon discover that the only power left in this state, with which to fight the huge monopoly now forming, is the power that has been kept for the people in the streams of the national forests.

And then, perhaps, it will be found that those politicians who have gained the votes of the people of this state by virtue of the federal conservation policy have not been Colorado's friends, but her enemies.

## FEDERAL CONTROL

THE decision of the supreme court, denying the right of states to impose reciprocal demurrage charges on interstate commerce, simply emphasizes the need of federal control, not only of railroads, but of all industries. The logic of events is making the old state rights theories obsolete, and the Democratic party will become as obsolete as they unless it changes its platform to conform to changing conditions.

## OUR FAITHFUL CARRIERS

THE GAZETTE employs 23 carriers. During the past two mornings the thermometer has hovered in the neighborhood of 30 degrees below zero at 5 o'clock, when the distribution of the papers is begun. Yet every one of those boys has been at his post, and The Gazette has been delivered. Would an equal number of men have shown such faithfulness?

## SEND YOUR PENNY

HAVE you sent your pennies to help pay the fines of those Idaho editors who, in jail, are fighting the battle of all men against the despotic effort of the courts to prevent all criticism of their actions? If not, you're not doing your full duty as an American citizen.

# OPEN PARLIAMENT

(All letters intended for the Open Parliament must bear the name and address of the writer, not necessarily for publication, but as evidence of good faith. Controversial letters will not be published without the signature of the writer. Communications for this department should be limited to 400 words and should be free from personalities.)

## TO THAW FROZEN WATER PIPES

To the Editor of The Gazette.  
With so many water pipes frozen as at the present time, the following method of thawing them out—nature's perfect law—should be of great benefit to many people. In the case of a frozen pipe dig down to the pipe, or nearly to it. Repeat this process at intervals of 15 feet along the line of the pipe. Fill the holes with hydrant water, no matter how cold it may be, and, if possible, keep them full. Within a very few hours nature will have done her work, notwithstanding the longest distances. The above rule will apply to the largest water mains in cities, as well as to smaller pipes in private houses.  
REV. EDWARD LEY.  
Manitou, Colo., January 7.

## POINTS ON GENESIS.

To the Editor of The Gazette.  
There was a world-wide study of the first chapter of Genesis last Sunday.  
If God, who is infinite in wisdom and power, was talking to finite beings whose wisdom and capacity might easily be cramped with a finite knowledge, he would not talk to us in terminology of his invention.

In the first verse God created the heavens and the earth. We understand the heavens and the earth mean the sun, moon, stars and planets and the space in which they move. It looks reasonable that, if God created them in the first verse, he did not recreate or make any of them in the fourteenth verse. If he created them in the fourteenth verse, he didn't create them in the first verse. In the fourteenth verse God is giving additional information he didn't give in the first.

Now we all believe the day of 24 hours are dependent upon the earth and the sun. In the first verse God created the heavens and the earth, which include the sun. If the light spoken of in the third verse was not the light of the sun, but was sufficient for the end in view, why did God feel the necessity of creating a new light? What became of the old light and the thing that caused it—its principles?

If the sun and moon were created in the first verse, and our days are dependent upon them, then the day is 24 hours long. If they are not 24 hours long, but millions of years in length, the sun and moon of equal length millions of years ago died is not the exact symmetrical God we know him to be. This is hardly conceivable.

The whole creation is one gigantic miracle and cannot be explained by any theory of science, any more than the raising of Lazarus can be so explained. No one questions but, at the word of God, man sprang forth. So, likewise, he spoke, and the heavens and the earth, and the gold and silver and coal and the rocks and the strata in the earth appeared.

If this is not so, then we must look to poor, limping science for an explanation of a gigantic miracle, for the fathoming of the mystery of the deep unknown. But geology can account for the existence of nothing. Science can only, with a trembling, feeble hand, read and that speculatively, the autograph of God written in the heavens and the earth.  
DR. H. G. WOODWORTH.  
Colorado Springs, January 5.

## Discounting One's Own Opinion

By RUTH CAMERON.

If you can trust yourself when all men doubt you, but make allowance for their doubting, too. Kipling.

Do you discount the value of your own opinion? You don't know what I mean? Why just this: do you take your own peculiarities into consideration when you are reckoning the value of your own opinions? Almost everyone discounts the value of other folks' opinions and advice by the temperament and peculiarities of these people. Not always consciously, perhaps, but with a swift subconscious process like the reckoning of a lightning calculator.

For instance, when Mr. H., who is well known to be of an exceedingly cautious temperament, says to you of some venture which you are considering, "Don't do it. It's too risky. Put your money in the savings bank. It's the only safe way," you don't take that pessimistic point of view at its full face value. Possibly you discount it about 50 per cent. Possibly more.

Again, if Mr. P., who is equally well known to be a high roller and will usually win out, in their day of conservatism the American stomach appears to have been overlooked. Until medical science is able to install new digestive equipments at a small expense the American stomach ought to be conserved with jealous care for the benefit of the American disposition.

Do you know a single person who is perfectly balanced, neither too optimistic nor too pessimistic, too cautious nor too radical, too conservative nor too quick to act—in short absolutely without a single overbalance which needs to be corrected? Probably not. I'm sure I don't. Then why take it for granted that you are such a person?

Why not use the same wisdom in dealing with yourself that you do in dealing with other people? Study yourself. Find out where you are overbalanced, whether more cautious or more impulsive, more hopeful or more pessimistic, than the norm and then use your knowledge to discount the value of your own advice.

No, it's not the easiest thing in the world to do. Of course not. It is never easy to do great things. And according to the greatest rule the world has ever known, to "know thyself" is the greatest thing man can ever do.

## THE ARIZONA ARISTOCRACY.

From the El Paso Review.  
The bride, a beautiful girl of the blonde type, wore a handsome costume of blue silk and tulle, and carried a bouquet of carnations tied with mull of the same color. She was attended by the charming Mrs. Pat Nathan, who wore a robe of cloth of gold and a jacket of tulle. The groom was attended by his best man, Mr. William L. Lewis, a well-known local politician, who wore a black tuxedo, a white pocket square and a white bow tie.

## COOKS

By GEORGE FITCH.  
Author of "At Odds," "Old Siwash."

A cook is a genius who is able to combine the contents of a meat market and a grocery store in such a manner as to tempt a man to overeat himself whether he is hungry or not. Cooking is the greatest profession in the world. There are upwards of 25,000,000 cooks in this country alone and a number of them are good cooks. The difference between a good cook and a bad cook is greater than the difference between heaven and the seventh heavens.

A good cook can take an old shoe, a little salt and some edible debris of various sorts and make a soup from them which would cause a feverish appetite.

A good cook can take an old shoe and make a soup which would cause a Republican to forget last November's election.

A good cook can take an old shoe and make a soup which would cause a Republican to forget last November's election.

publican to forget last November's election and sing for joy. A bad cook can take a cross section of a sweet and toothsome young cow and anneal it so successfully that the hungry diner will eat his napkin instead. Cooks, like violinists, are born, not made. Some women can only 14 ingredients by guess, bake them until they have finished a story and produce a masterpiece which will make the water yell for more. Other women cook with a pair of apothecary's scales and a stop watch and produce only woe and dyspepsia.

Cooking is a duty of woman and eating the result is a duty of man. The more duty the sadder the world. The cook, like the violinist, he made a pastime, an accomplishment, an art and an inspiration in which cases eating the results soon becomes a distraction.

On cooking depends the happiness of matrimony. Love usually lasts as long as digestion. Good cooking cement a family unbreakably together, while bad cooking drives it howling to the lunch counter and the divorce court.

In spite of all these things, nobody pays much attention to cooking. We spend millions in this country teaching our girls to write in a neat round hand, which will go out of style as soon as the new copy books come in. But we spend very little in teaching them how to take a pint of flour and treat it with benevolent results.

Education cannot produce kitchen geniuses, but it can utilize the amateur cook to a wonderful degree. In these days of conservation the American stomach appears to have been overlooked. Until medical science is able to install new digestive equipments at a small expense the American stomach ought to be conserved with jealous care for the benefit of the American disposition.

Good fortune awaits at the end of a journey or after some change in your affairs. You will form new friendships and the old friends will prove their worth.

Those born today will be of strong nature and will usually win out, in their day of conservatism the American stomach appears to have been overlooked. Until medical science is able to install new digestive equipments at a small expense the American stomach ought to be conserved with jealous care for the benefit of the American disposition.

## DARTMOUTH ALUMNI HOLD BANQUET IN DENVER JAN. 10

DENVER, Jan. 7.—A message from President-elect Woodrow Wilson will be delivered to the Dartmouth Alumni association at their banquet at the University club Friday night by S. H. Thompson, of Princeton, a former Princeton football star and an intimate friend of the president-elect. Dartmouth is said to be the largest college in the country, having 1,300 students. Mr. Thompson has been asked to be a guest of the association and will talk of the close relations which are being established between Dartmouth and Princeton.

Most of the 400 Dartmouth alumni in the state will be on hand to welcome the president of the college, Ernest Fox Nichols, one of the ablest educators in the country and a physicist of international reputation, who will be present at the banquet.

## DOCTOR PERFORMS AN OPERATION ON HIMSELF

MINNEAPOLIS, Jan. 7.—Driven to desperation by pain and his inability to find a surgeon who could relieve him, Dr. W. M. Beck of Clarkfield, Minn., stood before a mirror in his office, made an incision just below his left jaw, cut away the flesh from the point of the chin almost to the left ear, scraped the bone and then sewed up the wound. His operation, however, failed to relieve him of a growth which threatened to destroy the jawbone and today he is in a local hospital where another operation has been performed.

When Dr. Beck performed his own operation he was aided only by a nurse who was in the room to assist him.

Remember, when you have a gift to buy, this store is devoted to that.

# HARDY'S

16 N. Tejon

## THIRTY YEARS AGO TODAY

January 8, 1883.

W. E. Jewett, the civil engineer, had just received from the engravers his new map of Colorado Springs. It was the most complete ever published and showed every building in the city.

A meeting of the grocers was held and steps taken to form a retail grocers' association.

At a meeting of Company A, Ed Frost was elected to the office of second lieutenant. Mr. Frost was said to be one of the oldest militiamen in the state, having started his service by

## enlisting in the Pike's Peak rangers in 1878.

January 8, 1893.

Frank Perkins came up from Creede, bringing good news regarding the developments in the Chisopatria mine, which was owned in this city.

James Clark was killed as the result of being thrown from a buggy when the horse he was driving ran away.

There was considerable excitement in Cripple Creek over the alleged jumping of the Prince Albert claim on Beacon hill.

## enlisting in the Pike's Peak rangers in 1878.

# THE HASKIN LETTER

## IMMIGRATION

## XXX—FUTURE HUMAN MIGRATIONS

By FREDERIC J. HASKIN.

It seems reasonable to assume that the end of the migrations of man is still centuries away, and that many a generation will rise and pass beyond earthly concerns before any approximate equilibrium of population will be established. Indeed, it is probable that so long as the world stands economic opportunity will call people as well as individuals to move from country to country, and from continent to continent. A study of the map of the world reveals how unequally distributed are the people of the earth, even when measured by the opportunities of getting a living. For instance, Asia has a population of 50 per square mile; Europe has 100 people to the square mile; North America has 15; Africa, 11; South America, 7; and Australia, 5.

It must be plain to every person who has a reasonable knowledge of the relative resources of the several continents, that South America has the latest ability to support 50 people to the square mile as easily as Europe can support 100, and if that is true there is room on that continent for 500,000 immigrants and their descendants. It also seems to be evident from a comparison of the relative resources of North America and Asia that North America with its up-to-date western world system of agriculture, manufacturing and commerce, can support a population of a density equal to that which Asia supports today with its out-of-date and antiquated agricultural and industrial methods. If that be true, then North America might yet find room for 800,000,000 souls. Africa is not for the most part, and somewhat inhospitable to civilization, and yet the spread of the science of tropical medicine makes it as available a place for human existence as equatorial South America in general, and Panama in particular. Leaving out the Great Sahara, it might support a population of at least 25 to the square mile, and that would mean room for an increase in population of more than 150,000,000 souls.

## Asiatics Are Barred.

Australia, likewise, might accommodate at least 25 to the square mile, and that would mean nearly a hundred million souls could find room on the smallest continent. In other words, with South America and North America having a population half as dense as that of Europe and equally dense as that of Asia today, there would be room for an immigration to those continents of nearly nine hundred million souls. As things stand today, Europe and Asia, with about two-fifths of the world's area, support four-fifths of the world's population.

It naturally follows that from these two continents must flow the rivers of humanity which will bring the Asiatic tide to the earth to a common level ever is reached. And as long as the other continents set up the bars against the Asiatics as they are doing today, not much of the immigration of the future can come from there. Europe, for centuries witnessed one tide of humanity after another sweep westward from Asia—the Celtic, Teutonic, the Latin, the Slav—and its population has grown until it is now four times as dense as the rest of the world. And this, in spite of the fact that once the Asiatic tides of humanity ceased to sweep westward, other tides in turn started out of Europe, whose ends are not yet, and which already have carried perhaps a hundred million souls across the

## Expect Boom Result of Canal.

Perhaps the most interesting probable development in human migratory matters for the early future is the indicated tide that gives promise to be sweeping through the Panama canal. All the world looks for a boom throughout the Americas as a result of the opening of the great waterway. And especially is this to be true of the Pacific side of the two continents. Suddenly all this vast region is to be brought 5,000 miles nearer to the immigrant embarking ports of Europe. 500 hours' sailing closer for the interchange of commerce. Instead of San Francisco's being as far by water from Liverpool as Siles is from New York, the city of the Golden Gate

will be brought as near to Liverpool as New York now is to Bombay.

When everyone believes an era of great development is coming, everyone squares himself to greet it and to profit by it, nothing can stop its approach. And such a getting ready for the prosperity that is coming no one ever saw as is now to be found on the west coast of the two Americas. These preparations are not in the shape of such a tremendous rise in values such as to discount the future for a generation, but rather in the shape of a widespread plan to be ready to open up the latent resources of these regions, the minute conditions are ripe. It gives no indication of being an era of speculation on things that exist today, but rather it promises to seek its reward in the development of latent wealth. With such a concerted, united, common-consent plan for reaping the benefits of the canal, there is going to be almost an unprecedented demand for labor in western panamerica. There will be no bubbles of speculation to burst, but rich tides of industry to gather.

## Steamship Lines Preparing.

Already the big steamship lines are planning to take advantage of the situation. They will have large fleets of immigrant-carrying ships, equipped with the excellent accommodations which the "new" staterooms provide ready to carry laborers and their families to those new fields of abundant opportunities for work and good pay. The labor centers of Europe are watching with interest the approaching completion of the canal, since the tide of immigration that will set through it will mean not only better wages for those who go, but likewise for those who stay behind. The cutting down of the labor supply in Europe has consistently helped the wage earner who remained behind to get a better wage than he could command before his brethren answered the wanderlust begotten of economic conditions, which called upon them to take up their possessions and join the great caravan of humanity bound to the new world.

An inkling of what the west coast of the Americas may be able to ultimately do in the way of furnishing homes for a new population is to be gathered from Salvador. This country, with an area as small as that of 19 countries, like it could be tucked away within the confines of the night state of California, has a population of 1,707,000 souls. In other words, while California today has a population of 2,337,000, according to the Salvadoran standard it could support some 49,000,000 people. Anyone who has traveled from La Libertad to San Salvador, from San Salvador via Sonsonate, from Acapulco and Zacaapa, and who has taken up with "volcanic" mountains knows that Salvador has no greater proportion of arable land than California. Furthermore, having seen the tropical system of agriculture and industry, he knows that California can easily produce with product and resource the Salvadoran. The Salvadorans are the most prosperous people of the west coast, in spite of the remarkable density of population found there. Duplicating the population of Salvador, the other countries of Central America could find room for upward of 30,000,000 souls above their present population. Mexico could furnish an additional place for nearly 350,000,000 additional people. Measured according to the Salvadoran standard, the Americas ultimately could accommodate the estimated population of the entire earth today. Of course, such a time may never come, and certainly will not come for many centuries, but it demonstrates the possibilities of the west coast.

## Must Stop at Americas.

It seems certain that the opening of the Panama canal will give new force to the saying that westward the course of empire takes its way. But that age-long tendency of the unceasing drift of humanity will stop with the Pacific shores of the Americas, for beyond the lies Asia, where the movement began, and where there is no room for new immigration. The indications all point (Continued on Page Five.)

## WHERE IS THE MONEY?

Advance Agent of "Louisiana Lou"  
Loses Coin and Offers Reward  
for its Return.

Dollar! Dollar! Who's got the dollar? Well, who has got the dollar? That's what Tom North wants to know. It's what S. N. Xye, manager of the grand opera house, wants to know. Harry Askin, owner of "Louisiana Lou," wants to know.

Who's got the silver dollar, as good as gold, bearing across the silver face the eloquent caption, "Louisiana Lou," and able not only to purchase what ever any dollar will buy in these merry times, but also to obtain two of the best seats at the opera house, when the show comes here Monday, January 13.

The silver dollar is a precious pocket piece of Tom North, who is advance representative of the "Louisiana Lou" company, one of the greatest attractions to visit the city this season. He came by the dollar through a curious accident. His pocketbook, containing this coin and a steel die on which the words "Louisiana Lou" were engraved, fell from his hand one day at the beginning of the season, just as he was showing his ticket before getting on the train in Chicago. The train backed a few feet at the same moment, just enough to flatten out Mr. North's pocketbook—it had been there before from other causes—and pressed the steel die so fervently to the side of the silver dollar that the words on the die were imprinted on the coin without injuring either.

"North wouldn't part with the dollar for anything," he knew it. But yesterday he paid the coin out to somebody in Colorado Springs, and all his efforts at recovering it during the remainder of the day were vain. So finally he decided to offer two of the best seats the opera house affords to the person who presents the "Louisiana Lou" dollar at the box office, January 13, so that it may be forwarded to him.

Dollar! Dollar! Who's got the dollar? Of course, you want to see it if it's you.

## LITTLE SUFFERING FROM INTENSE COLD REPORTED

Suffering due to the intense cold of the last few days has been very slight, and few homeless men have applied for aid at the Associated Charities, according to Wood E. Worcester, agent.

"It is surprising that the calls are so few, especially those for coal," said Mr. Worcester. "We expected a large number of calls, especially from men, but received only three."

A gift of 25 tons of coal was given the association, to assist needy families.

## Burns-Republican Libel Suit to Be Heard Again

In the libel suit of James F. Burns against the Republican Publishing company of Denver, the state supreme court has reversed the decision of the lower court in favor of the Republican and remanded the case for a new hearing.

An article published in the Denver Republican several years ago, during the Burns-Burns controversy, in which it was intimated or charged that Burns had corrupted a jury which decided in his favor at Council Bluffs, Iowa, resulted in the suit.

The lower court held that the matter contained in the article was not libelous.

## GOES TO PUEBLO

Edgar E. Martin, of Colorado Springs, has been appointed chief clerk at the Hotel Vail, in Pueblo, and has disposed of his business interests in this city. Mr. Martin is well known here, having been connected with several local hotels for several months, and later going into business. He will be under the direction of J. L. Bush, formerly manager of the Acadia hotel here, who recently took the active management of the Vail.

## INSIST ON MUNYON'S

## COLD REMEDY IT WILL CURE

Munyon's Cold Remedy relieves the head, throat and lungs almost immediately. Checks Fevers, stops Discharges of the nose, takes away all aches and pains caused by colds. It cures Grip and obstinate Coughs and prevents Pneumonia. Price 25c. All drugists.

## TEAMSTER FALLS UNDER WAGON AND IS KILLED

Crushed under the wheels of his wagon, Joseph A. Evans, a teamster, 30 years old, sustained injuries yesterday morning at 8 o'clock from which he died 30 minutes later. The fatality occurred at the intersection of Huerfano and Huerfano streets, where Evans, an employee of the city, had been removing snow.

The team had started west on Huerfano street, with Evans walking beside the wagon. He reached for the reins, slipped and fell under the wheels, which passed over his chest. Mike Hargett, conductor of an ice truck car, and others who witnessed the fatality hastened to Evans' assistance and carried him into the drug store where a physician who had been summoned did all that was possible to give him relief. Without uttering a word, Evans died 30 minutes after the accident. The body was removed in the police ambulance to the undertaking establishment of Fairley & Law.

Evans lived at 44 East Las Animas street, and is survived by his widow, Mrs. Minnie Evans, and two sons, Earl, aged 11, and Victor, 8. He had lived in Colorado Springs for about 12 years, coming here from central Kansas, where his parents now are living. An inquest will be held this morning at 10 o'clock at the court house. The funeral will be held this afternoon at 2 o'clock from the undertaking establishment of Fairley & Law. The interment will be in Evergreen cemetery.

## WILL DISCUSS PARCEL POST AND EIGHT-HOUR LAW FOR WOMEN SOON

A discussion of the parcel post and its benefit to the merchants of Colorado Springs, and an outline of the plan to be adopted by employees relative to the eight-hour law for women, will be the incentive for a special meeting of the merchants' division of the Chamber of Commerce, Friday night. Postmaster Stanton will outline the parcel post and its advantages to the business men. Hinton will be served.

The eight-hour law matter has been hanging fire with the merchants for some time. Several weeks ago, the law was discussed and a number of schemes for its application were suggested, but no definite action has been taken. A committee was appointed on the matter, but has returned no report as yet.

## WEATHER NOT SO COLD

Colorado sunshine routed the cold wave yesterday morning, forcing the mercury to 10 degrees above the zero mark, and gave promise of higher temperatures today. Instruments at various points of the city last night registered below zero, but did not indicate very far. The lowest reached since the 27 mark was 24 degrees below, which was registered only yesterday morning. The temperature at 6 a. m. was 17 below, and increased until it reached 10 above at noon. The temperature at 6 p. m. was 4 below zero.

## EXAMS IN DENVER THIS MONTH FOR STATE JOBS

An examination will be held in Denver, January 22, for the office of state commissioner of public printing, and one the next day for state commissioner of insurance. The printing commissioner receives a salary of \$2,500 a year. He must furnish bond of \$50,000 and must have had at least five years' experience as a practical printer.

The subjects of the examination and the weights given them are as follows: Spelling, 5; arithmetic, 5; letter writing, 5; penmanship, 5; copying from rough draft, 10; abbreviations, 5; correcting proof embracing interpretation of proofreaders' marks, 15; tabulating (arranging of matter in tabular form and indication of the result); experience as job and book compositor, estimating and computing job and book work, 35.

The insurance commissioner receives \$3,000 a year, and must furnish bond of \$50,000. He must be experienced in the insurance business.

The subjects of the examination and the weights given them are as follows: Spelling, 5; arithmetic, 5; letter writing, 5; penmanship, 5; duties of the position, 20; experience and personal qualifications, 30; insurance, 40.

Application blanks and other information may be secured from T. L. H. Fribourg, clerk of the civil service commission, 514 Boston building, Denver.

## NEW TRIAL FOR MURDERER

From the shadow of the gallows, George King, 28 years old, self-confessed murderer of Peter (Felix Jackson), an aged Elbert county farmer, has been given another chance for life by the supreme court of Colorado, which has reversed the decision of the Elbert county district court which on July 11, 1912, sentenced King to hang for the homicide. John Fields is the prosecutor.

The reversal was based on technicalities, but the supreme court held that his trial was too speedy. King was convicted 10 days after the crime, and was sentenced to hang in October, 1911. The new trial probably will be held next June in Kiowa.

According to their own confession, King and his accomplice, Fields, 19 years old, a shepherd, hid behind Jackson's ranch house, and shot their victim as he was striding over his horse. The then sheepman, with an ax, and from his pockets removed several hundred dollars which they had near the house of the ranch. King has only one arm.

## ACTION SUPREME COURT ON RAILROAD QUESTION ENCOURAGES LOCAL MFM

The state supreme court has refused to grant a rehearing in the case of the Colorado and Southern railroad against the state railroad commission. In this instance sustaining the order of the commission that the road at once reopen for traffic its double line between Canon and Breckenridge. This decision is held to indicate success for those "rate-busters" to have the line of the Colorado and Southern between Colorado Springs and Elizabeth, which has been out of operation for several months, reopened for traffic, as there is a great similarity between the two cases.

A. D. Parker and C. K. Burnham, vice presidents of the railroad, appeared before the state railway commission yesterday and announced that they had given orders for the immediate reopening of the line between Canon and Breckenridge. Mr. Parker said that the company has not yet decided whether or not to take the case to the supreme court of the United States.

## BOY PREACHER TO TALK BEFORE SALVATION ARMY

The Rev. Charles Mundell, known throughout the southwest as the boy preacher, is to begin a series of revival meetings at the Salvation army, 122 South Cascade avenue, next Sunday night. Mr. Mundell is but 17 years of age, and has been preaching for the last two years. During the

REV. CHARLES MUNDELL. The Boy Preacher.

present year he has had about 250 conversions in western Texas and eastern New Mexico.

He is a regularly ordained Baptist minister, and well qualified for his work. Mundell is looking extensive arrangements for these meetings, and is trying to arrange with the small seating capacity of his hall so that everybody will have the opportunity of hearing this evangelist. Special services will be held at the hall every day at the noon hour, when a light lunch will be served to all who come free of charge. Every night in the week at 8 o'clock Mr. Mundell will speak. He brings with him a corps of helpers, including a singer and pianist, so that every effort will be made for a successful meeting. An invitation is extended to all.

Always pure, always fresh—Bryan's Peanut Butter.

## OFFICERS REELECTED

Officers of the Newton Lumber and Manufacturing company were reelected yesterday at the annual meeting, as follows: Frank E. Johnson, president; Whitney Newton, vice president; and W. C. McClung, secretary-treasurer.

## SPINAL IRRITATION

That's what causes—Pain, aching or distress in back part of head; pulling of cords in neck; trouble with eyes; pain between shoulders or in other parts of spine; or a burning, aching tenderness or soreness, heat of corners of hands or feet, or feeling of numbness of hands or feet, or feeling like prickling of pins; peevish, almost indescribable pains or distress in heart, stomach, kidneys or other parts of chest or abdominal backache; sciatica. If you have any of the above symptoms, most likely you have spinal irritation and can be cured. Though but few physicians know how to cure this disease, it is very easily cured by right methods. Our elegant, illustrated booklet tells how. Price, 5c. STATE PUBLISHING CO., 925 The Birmingham, Cleveland, Ohio.

## EAGLES TRYING TO LAND 1915 MEETING FOR CITY

At a meeting Monday night, the Peak series No. 148. External order of Eagles, installed the following officers for the coming year: J. E. Davis, junior past worthy president; George L. Beiler, worthy president; Roy A. Davis, worthy vice president; G. L. Spain, worthy chaplain; Edward Hinn, secretary; Charles Stearns, treasurer; Bert Spencer, outside guard; Robert Griffin, inside guard; and E. H. Marley, trustee for three years. After the exercises a supper was served, and a set of bird-paris trophies of the World was given to R. E. Davis, retiring president. A number of candidates were initiated. The local order is trying to secure the sixteenth annual convention of the Eagles the 1915 gathering to come to this city. The convention last year, with an attendance of 1,000, was held in Cleveland, and the one this year will be held in Baltimore.

## EL PASO REPRESENTATIVES ARE ON MANY COMMITTEES

El Paso county representatives in the state legislature, Warren S. Persons, J. T. Kavanaugh and Thomas E. Thomas, tarred well in the appointments to house committees announced yesterday morning by Speaker Skinner. The appointments follow:

Representative Kavanaugh—Chairman federal relations committee; member committees on public lands, printing, Indian and military affairs, and labor.

Representative Persons—Member of committees on mines and mining, state institutions, judiciary, banking, constitutional amendments and education.

Representative Thomas—Member of committees on roads and bridges, towns and cities, mines and mining, fish and game.

## Personal Mention

W. L. Woodside has returned from a two weeks' trip through Missouri and Tennessee.

Mrs. Marguerite Schmitt, 1111 Colorado avenue, has gone for an indefinite stay in Eugene, Ore.

# HAPPENINGS IN THE WORLD OF SPORT

## Chance Signs Contract Today With Yankees

FRANK CHANCE, YANKEE LEADER.

CHICAGO, Jan. 7.—Frank Chance in all probability, will sign tomorrow as manager of the New York American league club. After a five hour conference this afternoon with Frank Farrell, owner of the New York club, Chance admitted that Farrell's "arguments" had been strong enough to cause him to waver from his decision to retire from baseball for a year.

The conference will be resumed tomorrow and it is expected that any differences that remain will be smoothed away and the formal announcement made that the "peerless leader" will assume the management of the "Highlanders."

While the terms offered Chance were not revealed, it is rumored that his contract will call for a salary approaching \$20,000 for a term of years and an interest in the club.

## Bostonians Also After Larry Lajoie for 1913

BOSTON, Jan. 7.—There is a rumor in this city that the Boston Americans may trade catcher Bill Vanecko to the Cleveland Naps for second baseman Larry Lajoie, formerly of the New York Yankees. The Cleveland club is willing to give up Lajoie if it can get a good offer and is particularly anxious to strengthen its catching department.

If King Larry should come here he would be used at first base, as he could be spared by either Red Sox or Cady will do the bulk of the Boston catching next season and "Smokey" Lajoie is a good relief man.

Lajoie has been in the game for 15 years, as he thinks it is the best ball town in the world. He would be a big attraction for the Boston club.

There are many other American clubs which could use Lajoie. Of course, the veteran may not be as good as he was several years ago, but he has the same old hitting ability and a second base for either the Yankees or Browns. With a run needed to win and a man for base, Lajoie is as welcome a sight to a pitcher as a charging rhinoceros might be to a hunter who has just discovered that he has forgotten to load his gun. Lajoie may not cover the ground as much as he used to, but he still covers more than most ball players.

The Senators are another veteran who might use the old Yankee. Griffith has never been able to find an entirely satisfactory man for the second sack. In Morgan he had a man who could cover ground, and in Lajoie a man who could bat, but neither one combined the two things. Lajoie has fielded better than Morgan and has better than Lajoie and Morgan put together.

Detroit and the White Sox might find use for Lajoie as a first baseman. In fact, it would appear that Lajoie in the league is in more vital need of the veteran than is Boston and therefore must be prepared to offer a better trade for him.

## Yale Will Adopt The Stroke Used By Oxford

NEW HAVEN, Jan. 7.—When Yale meets Harvard in the annual regatta on the Thames next June, the blue team will use a stroke similar to that in vogue at Oxford. It was announced last night that Captain Snowden of the Yale varsity crew, accompanied by Head Coach W. A. Harris and Alumni Advertiser Coach Jim Rodgers, will sail for London Saturday of this week and study the Oxford rowing system for three weeks. Upon their return, the candidates for the various crews will be taught the Oxford method.

## Trip For Dartmouth Team

DENVER, Jan. 7.—Acceptance was received in Denver last night of the Denver Athletic club's invitation to the Dartmouth college track team to meet some western university team in Denver during the first part of April.

The club has sent representatives to Leland Stanford university with the hope that its track team will consent to meet the eastern college team here should Leland Stanford refuse. The University of California will be invited.

## Westergaard Claims Title Gotch Gave Up

MINNEAPOLIS, Minn., Jan. 7.—After Henry Gotchmann of Minneapolis had won the first fall with a half nelson and a clutch hold, in 24 minutes, his opponent, Jesse Westergaard of Los Angeles, won two straight falls, and claims tonight the heavy-weight wrestling championship of America. Frank Gotch, retired champion, was referee.

Westergaard won both his falls with a reverse nelson, the first in 19 minutes and the second in one and a half minutes. Gotchmann's hip and shoulder were injured in the second fall.

## Maryland Footballers To Meet South Dakota Lads

VALLEJO, Jan. 7.—The football team from the cruiser Maryland, which had held the championship of the Pacific coast since the decline of the Winged V's of this city, will clash with the eleven from the cruiser South Dakota, Sunday afternoon, at "Redwood park." The Marylanders have been under the direction of Charley Goheen, the old Redhawk club and Winged V star, for the past two years, and have been unbeatable.

## Jap Turns Tables; Wins Second Block

CHICAGO, Jan. 7.—Koji Yamada, the Japanese billiardist, turned the tables on George Slosson in the second block of their 2000 match tonight by winning 467 to 400 in 24 innings. The score now stands: Slosson, 890; Yamada, 711. High runs: Slosson, 43; Yamada, 134. The third block will be played tomorrow night.

## Plan Rowing Race

CAMBRIDGE, Mass., Jan. 7.—Harvard, Princeton and the University of Pennsylvania will meet in a three-cornered rowing race on the Charles river early in May, according to plans announced today.

The event will mark Pennsylvania's first rowing appearance at Harvard for many years.

## Holy Name 7; Blakes Get 1

The Holy Name indoor baseballists made a clean sweep of the Blake team last night at the Y. M. C. A. in the race for the Pike's Peak league cup, winning by the score of 7 to 1. Barnes, who flung 'em for the Holy Name crew, had the Blakes at his mercy during the majority of the innings, although his opponent, St. John, did effective box work. The victors did their good stick work in innings that meant runs. The game was particularly free from errors.

## Mature Increases Lead Over De Oro For Billiard Title

NEW YORK, Jan. 7.—James Mature of Denver increased his lead to nearly 100 points over Alfredo De Oro, the world's pocket billiard champion, in the second night's play for title honors tonight, the total score standing 490 to 308. Tonight's score was 200 to 120. De Oro played far below form, but steadied himself at one time for a run of 33, the highest thus far. Mature played consistently, making a run of 24.

The final block will be played tomorrow night.

## Farrell Signed

BOSTON, Jan. 7.—Charles (Duke) Farrell, the veteran catcher, was signed by the Boston American baseball club today. Farrell will coach the recruit pitchers. The world's champions at present have 15 pitchers on their rolls.

## Johnson's Illness Delays Meeting

CINCINNATI, Jan. 7.—The national baseball commission will hold its ninth annual meeting in Chicago, January 16, according to an announcement made today by President Thomas J. Lynch, member of the National league. The date is subject to change, however, in accordance with the length of Ben Johnson's illness.

At this meeting the officers will be elected, the annual reports read, and it is probable that a decision will be announced on two matters important to all minor league clubs.

At a meeting today of the commission, at which Chairman Hermann held the proxy of President Johnson, all the evidence in the requests of the National Association of Minor Leagues for a uniform players' contract was taken. Likewise, the evidence on the individual salary limit of minor leagues was heard and the matter taken under consideration. Chairman Hermann announced that the evidence would be submitted to President Johnson, and if he was well enough to read, it was almost a certainty that the commission would decide both questions at its Chicago meeting.

## Palzer To Try To Regain Lost Honors In England

CHICAGO, Jan. 7.—Al Palzer is going to England to fight Bombardier Wells as the first step in an attempt to climb back to a position from which to challenge for championship honors. This announcement was made here today by Palzer. He was a fellow passenger with Frank Chance, the baseball-leader, on the train from Los Angeles.

Monte Cross, former shortstop for the Athletics and last season a scout for the Browns, is seeking another scouting job, saying he prefers that work to managing a minor league team.

## White Sox to Play One Game in State on Trip

CHICAGO, Jan. 7.—Everything is completed for the club's but one game trip of the Chicago White Sox, except final arrangements for the de luxe special train which is to convey the party to California.

Dates for all exhibition games to be played on the return trip were announced yesterday by Manager Callahan and as they show only four stops for the first team between Los Angeles and St. Joseph, Mo., one must admit that the plan shows even more caution than was expected.

The idea of Callahan in the first place was that the players should spend most of the time in actual training on the coast and as little as possible in traveling over the long route. For this reason only enough exhibition games were booked for the return trip to permit the players to shake the stiffness out of their joints. Also, the manager has accomplished his wish to land the team in St. Joseph, Mo., for four full days of practice on the fine grass diamond of that city before it will be taken to St. Louis to open the championship season.

The home route of the second team is a bit harder, as it requires six stops and brings the players through a more northern region, where the weather may be chilly. However, even this is not so strenuous as the journey of the club in former years when it trained on the coast.

The exhibition games announced by the manager yesterday follow:

- First Team.**
- March 31—Yuma, Ark.
  - April 1—El Paso, Tex.
  - April 2—Amarillo, Tex.
  - April 3—Oklahoma City, Okla.
  - April 5, 6, 7, 8—St. Joseph, Mo.
- Second Team.**
- April 1—Ogden, Utah.
  - April 2—Salt Lake City, Utah.
  - April 3—Grand Junction, Colo.
  - April 4—Des Moines, Ia.
  - April 7—Ottumwa, Ia.
  - April 8—Davenport, Ia.

## In the Wake of the News

Marlin, Texas, training camp of the Giants, has a mystery. Marlin has many mysteries during February and March, but they are chiefly connected with the cuisine at the famous Arlington hotel.

This is another kind of mystery. A long, lean, left-handed young man showed up there the other day and began working out at Emerson park, the training field of the Giants. He declared that he is a pitcher, who signed and sealed by John J. McGraw, and his explanation of his presence is that he wants to get in good shape before the Giant chief arrives to look him over.

He declines to tell his name, but is going through a personally conducted course of sprouts every day. But for the fact that Monser Renshaw de marquis de Marquis is known in Marlin it might be suspected that the mysterious one is none other than the great holdout. None of the people of Marlin has even seen this particular bird before, however.

Groundkeeper John Murphy has been instructed to carefully investigate the unknown to see if it isn't Charley Faust in his left-handed disguise. In which case the training camp of the Giants will be swarmed forthwith. The only new left-handers signed by McGraw for spring tryout are Ferd Schupp of riding curve fame, and a fellow named Smith.

All Frank Farrell now has to do to sign Frank Chance, as we understand it, is to sign him.

It appears that what the white race has really been hoping for is a change to select someone champion of the world by acclamation of the white race.

Our idea of a real optimist is a guy following the racing game at Juarez who nevertheless had the heart to send out postal cards wishing people a happy new year.

We hereby bid one, two, three and three and a half cents, respectively, for the judgment of the white race against those four Giants.

The absence, to date, of suits against Josh Devore, John Murray and Larry Doyle, strikes us as discrimination against some very deserving baseball players.

Jose Rivera, the Los Angeles fighter, says with a Mexican accent, that he is an American because his ancestors were Spanish. Nevertheless, the betting still favors Lesch Crocs, the walk-down Turk.

We hasten to rectify the injustice the Bermudez Omeone, and make the prediction that it will be one of the strongest teams in the league. (Joke.)

They've managed to drop the "h" from the McGraws, but they'll never get away from that Luther.

It's a trifle belated, but with no desire to sound ironical, we really wish the New York Giants' Breach of Promise, Alienation of Affections, and Assault and Battery Defendants club as happy a New Year as possible under the circumstances.

Your Uncle Wilbert Robinson, the Hadji of Baltimore, and Tom Keller of the Peters Cartridge company, were out on the Maryland moors recently, patting a cartridge of ineffectual ducks. Mr. Keller returned to New York with some of the evidence of the assassination, and also with some hitherto unpublished details and opinions bearing

## Utah's Fight May Do Injury to the Schedule

SALT LAKE, Utah, Jan. 7.—Coach Fred Berman today received a copy of the conference schedule as revised since the annual meeting of the Rocky Mountain Athletic conference and immediately called a meeting of the athletic council, which, after discussion, decided that Utah cannot play the games on the dates provided in the schedule. In the discussion it was pointed out at the annual meeting December 28, Berman and Morrill had a fight hard to get a schedule that was, at all possible. Since then the Colorado schools have revised it, making it impossible. It requires unnecessary travel and gives Utah practically no rest between important games, and attempt would be made to have the Denver game thrown out entirely. The council decided that Utah will not accept the schedule as revised.

## Dartmouth Captain Is Found Ineligible by Self

HANOVER, N. H., Jan. 7.—Because W. T. Enghorn, recently elected captain of the Dartmouth college football team for next season, discovered that he was ineligible under the so-called three-year rule, the Dartmouth Athletic council has accepted his resignation. No date has been set for the election of a new captain.

Enghorn, an athlete, the athletic council said, at the time of his election he did not feel any doubt as to his eligibility, but subsequent consideration had led him to think the question might be raised. He told the council he had played on the Washington State college football team one year before coming to Dartmouth. The council decided that this, with his two years of service on the Dartmouth sports board, made him ineligible to play another season.

## Collegiate Regatta To Be Held June 21

NEW YORK, Jan. 7.—The intercollegiate rowing regatta, held annually on the Hudson at Poughkeepsie, will be held this year only a day after the Yale-Harvard race on the Thames at New London, according to announcement of dates made today. The date for the intercollegiate regatta has been set for June 21, nearly a week earlier than usual because tidal conditions in the Hudson are deemed unsatisfactory later in the month.

The stewards of the association have also set dates for next year, when the regatta will be held June 26, and for 1915, when it will be rowed on June 25. The advisability of substituting a race of junior eight-oared crews for the varsity four-oared race, which has been a part of the regatta since 1909 will be considered.

AT THE ANNUAL BUSINESS SHOW, NEW YORK CITY, NOVEMBER 11-16, 1912

# THE UNDERWOOD TYPEWRITER

AGAIN PROVED CONCLUSIVELY IN A PUBLIC DEMONSTRATION ITS SUPERIOR QUALITIES IN

**SPEED ACCURACY STABILITY**

Operated for eight solid hours (continuously) by 8 of the world's fastest typists, in half-hour relays, one Underwood Typewriter (taken from stock) produced the magnificent total of 55,944 words, averaging nearly 10 strokes per second. The crucial test of stability was here shown. Nowhere, at any time, has a typewriter turned out such a tremendous amount of work in the same time. This is a world's record.

The UNDERWOOD TYPEWRITER in the International Speed and Accuracy Contests won:

- First Nine places in the World's Championship.
- First Four places in the World's Amateur Championship.
- First Two places in the World's School Championship.
- Breaking all former records.

Every record, every year, in every contest is held by the UNDERWOOD.

"The Machine you will eventually buy"
